Drawings

1. The drawings filed on 01 September 2004 are acceptable subject to correction of the informalities indicated on the attached "Notice of Draftsperson's Patent Drawing Review," PTO-948. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-18, drawn to identifying objects in x-ray images using segmentation and/or edge detection, classified in class 382, subclass 132.
- II. Claims 19-34, drawn to storing object-labeled x-ray images, classified in class 382, subclass 305.

3. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as storing object-labeled x-ray images wherein the objects are identified manually, or using image analysis techniques other than segmentation or edge detection. See M.P.E.P. § 806.05(d).

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 2621

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. § 1.143).
